-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election

1. Applicant's election without traverse of species I in the reply filed on 12/20/05 is acknowledged.

Information Disclosure Statement

2. The information disclosure statement filed 11/28/05 has been considered. A copy of the 1449 initialed, dated and signed by the Examiner is included herewith.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Guillom (2002/0175323).

Guillom teaches an apparatus comprising a nanotube (nanoconduit) coupled to the surface of a substrate, wherein the substrate defines an aperture. The nanotube is contiguous with the aperture and substantially nonparallel (perpendicular) to the substrate surface. See figure 1 and accompanying text).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1775

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 22-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guillom (2002/0175323).

Guillom was discussed above and fails explicitly to recite the presently claimed nanotube and aperture shapes. However, it has been held that a change in shape does not impart patentability to a claimed product. Guillom teaches an aperture and nanotube construction. To configure the aperture and nanotube into a desired shape for a particular intended use is well within the purview of the ordinary artisan and, accordingly, is considered to be prima facie obvious in view of the teachings of Guillom.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy M. Speer whose telephone number is 571-272-8385. The examiner can normally be reached on M-Th, M-F.
